## **Equipment Checklists**

Personal Equipment Checklist	•
GPS	Ski poles
Suncreen	water
Bugspray	food
Polarized glasses	gloves work
Bear Spray	glasses safety
phone/camera	headlamp
battery pack booster for phone	clinometer
Hat	field vest
first aid kit personal	note book
Waders	Extra clothes
Boots	rain gear

Crew Equipment Checklist	•
Hand saw	Measuring board
Linesman Gloves x 3	Scale
Backroads Mapbook	Permits
Locational maps	Fish ID book
Background Documents	Site Cards / Field Guide
radio road	Minnow Traps
Inreach	Catfood
Field Safety Plan	Flagging
first aid kit level 1	Laptop w/basecamp
First Aid binder stocked	GPS cable
Throw bags	Lazer level
polaski	Assessment cards fish passage
shovel	UAV
fire extinguisher backpack	Flow meter
fire extinguisher pressurized	ATV
Oakton Multimeter	bucket rigid x 2

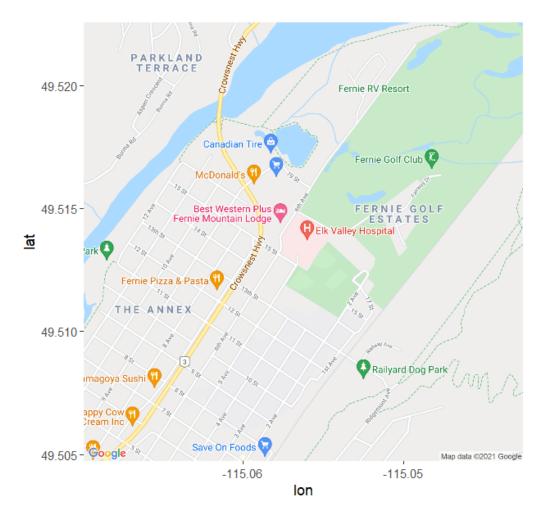

2

## new graph environment

Environmental Research & Consulting

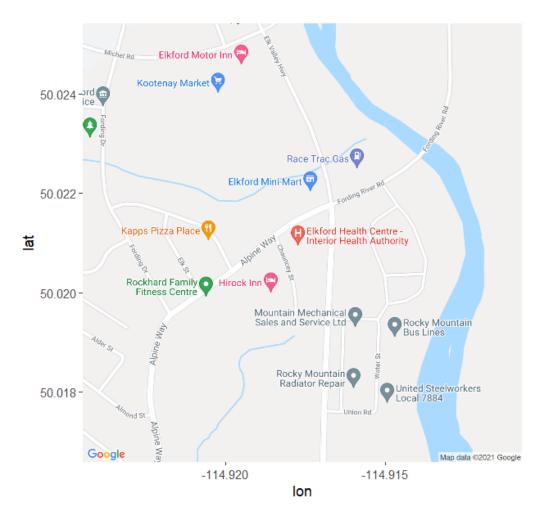

Backpack Electrofisher	bucket foldable
stop nets x 4	clove oil kit w/ instructions
salt blocks	gloves leather
loose salt	sharpies
dip nets x 2	hand lens
tape measure hand	ATV gas
tape measure eslon	ATV lock
pilon x 2	UAV battery charger

#### **Nearest Hospitals**

Elk Valley Hospital - 1501 5 Ave, Fernie, BC V0B 1M0 - 250-423-4453

# new graph environment Environmental Research & Consulting

Elkford Health Centre - Interior Health Authority - 212 Alpine Way, Elkford, BC V0B 1H0 - 250-865-2247

#### Field Plan

Field work methods will result in products feeding reporting formats such as the <u>2020 deliverables</u> and will generally follow procedures in:

- fish passage assessments (MoE 2011)
- <u>habitat confirmations</u> (Fish Passage Technical Working Group 2011).

Presence/absence of fish, species composition/density and distribution limits can be useful for prioritizing which crossings are a best fit for fish passage restoration and help inform follow up

### new graph environment

Environmental Research & Consulting

monitoring so electrofishing and minnowtrapping may be conducted. Standard Fish and Fish Habitat Inventory Standard Field Form <u>site cards</u> are used to gather habitat data.

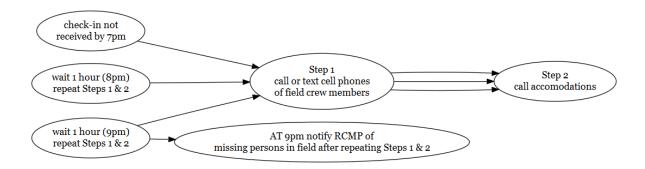

A summary of sites to be potentially assessed is included as Table  $\underline{2}$  and an overview map of displaying potential sample locations is included as Figure 1.

#### **Check In Procedures**

Call, text or inreach Tara Stark (2505059854) each morning to share the plan for the day (i.e. name of roads and sites). Check in time is before 7 pm each evening although we regularly check in throughout the day (ex. at arrival to site, 1pm and 4pm) on the inreach or by text and report position/provide updates.

#### **Procedures for Failed Check-In - for Check in person**

Procedures are summarized in the following Figure. If phone call or inReach check-in is not received by 7pm send text to inreach units, call or text cell phones of field crew members. If no response please call accommodations then personal emergency contacts to see if they have heard anything. Wait 1 hour and text inreach, text or call cell phones and personal emergency contacts and accomodations again. Repeat after 2 hours (9 pm) - if no response then notify the RCMP of a missing persons in field.

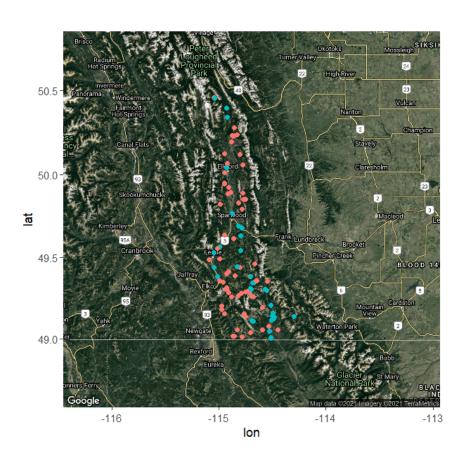

Figure 1. Map of potential sampling areas. High priority sites in red and moderate priority in green.

Table 2: CWF - Potential sample locations.

id_xing	Stream	east	north	source	id_map	comments	sp_upstr
50060	Harvey Creek	666579.3	5461445	2020_planning		Harvey Lake is 1ha lake upstream ~230m upstream of the crossing.	-
50061	Fuel Creek	667651.2	5459223	2020_planning	082G.109	Large stream but dry during assessment. WCT known	

# **new graph environment**Environmental Research & Consulting

upstream and wetted at 50151 (ford) located 600m upstream.	{WCT}					
5006	3 Kisoo Creek	668960.5	5458806	2020_planning	082G.109	Relatively large channel width.  Good flow and hab value rated – high.
5007	2 –	682784.9	5447731	2020_planning	082G.104	Small stream with good flow in photos. Assessment comments indicate good gravels. Very close to the mainstem of the Flathead.
5007	3 –	682180.0	5446356	2020_planning	082G.104	Fairly steep. comments indicate  "WCT found upstream by Artech in —  1995 according to Habitat Wizard"
5007	5 –	683797.4	5445297	2020_planning	082G.104	Smaller stream. –
5008	1 –	681879.8	5443723	2020_planning	082G.104	Large stream. Potential barrier. –
5008	4 –	680147.4	5439436	2020_planning	082G.104	Fish observed at outlet. Falls in FISS just downstream. Culvert appears passable to all life stages/species at time of survey but may be velocity barrier at higher flows.
5008	5 –	680488.4	5435930	2020_planning	082G.104	Larger channel width habitat rated as high value.
5008	6 –	680428.7	5435744	2020_planning	082G.104	Appears passable at most flows.  Rocky mountain sculpin nearby and their swim speeds could be a consideration.
5009	0 –	681743.0	5430951	2020_planning	082G.104	If this is the mainstem, habitat upstream at bridge appears mod to — high value.
5009	1 –	681610.6	5431531	2020_planning	082G.104	Good flow in photos. Smaller channel width. Not on mapped - stream location
5010	0 –	669510.1	5442206	2020_planning	082G.104	Larger stream but fairly steep with – relatively low habitat gain potential.
5010	1 –	669469.8	5442312	2020_planning	082G.104	Larger stream with good flow.  Gradients model as >15  downstream so naturally occuring barriers are fairly likely.

	50102	_	668217.8	5442479	2020_planning	082G.104	Good flow but very steep then extremely steep upstream.	_
	50152	_	638002.9	5483401	2020_field	082G.113	-	-
	50181	_	648276.6	5468171	2020_field	082G.108	_	_
	50185	_	645679.3	5469020	2020_field	082G.108	-	-
	50240	-	659199.0	5499658	2020_planning	082G.119	Comments indicate partially embedded and backwatered. Other comments indicate good candidate for bridge.	-
	50261	_	669029.6	5481120	2020_field	082G.114	-	_
	50273	Robert Creek	657671.1	5506277	2020_planning	082G.118	Dry channel. Small stream.	_
	62120	-	676693.1	5464482	2020_planning	082G.109	Small potential habitat gain but assessment comments indicate good rearing habitat and good potential fix candidate.	-
	62265	_	647692.6	5578674	2020_planning	082J.108	Splits upstream and gets very steep. Grainger indicates "Good potential for fix. Rearing habitat upstream."	-
